Attention: Mr. Stephen Kowalchuk
Chief Design Engineer

Dear Steve:

Enclosed are six copies of a report on our 'Preliminary Investigation of Ground Water Contamination Associated with the Llangollen Landfill, New Castle County, Delaware.' This report summarizes information gathered through the end of September, 1972. More extensive test drilling since that time has not significantly altered the hydrogeologic interpretation presented in the report.

An updated summary on the hydrogeologic conditions at the site including the latest test drilling and water sampling information will follow shortly. Copies of this summary will be sent to the Delaware Division of Environmental Control as agreed in our meeting in Dover on December 14.

If there are any questions on the information presented, please do not hesitate to contact me.

Very truly yours,

Michael A. Apper
Michael A. Apper
